_____

Article Description

'*i³* Portal' v4.00 replaces all previous versions as the latest remote view and access software for the *i³*. All existing users are recommended to upgrade to the new software, all new users should install it from the outset.

_____

Article Details

Installing the Software

- The software will have been supplied either as a download or from the IMO library CD. Either way you will have a 'zip' file which you should unzip to a folder on your hard drive.

- Next double click on the file '**setup.bat**'.

- The installation for i3 Portal will run, please follow the on screen instructions.

- Once complete a second installation will run. This is for the Microsoft Visual C++ Redistributable Library. Again follow the on screen instructions.

- Once both programs have been installed the installer will close and you can run the software for the first time.

Updates in this Version

1. This update has added support to i3C Mini and i3E controllers.
2. Background and object gradients
3. Bitmap Transparency
4. Improved Trends Object
5. Indication for Configuration Mismatch
